EMERGENCY OVERVIEW

Corrosive

Liquid and mist can cause severe burns to all body tissue

May be fatal if inhaled or swallowed

Water reactive

Appearance Clear, colorless Physical state liquid Odor odorless

OSHA Regulatory Status This material is considered hazardous by the OSHA Hazard Communication Standard (29

CFR 1910.1200). Safety information is given for exposure to the reagent as sold and considers exposure to the chemical if user has direct eye and skin contact.

Potential health effects

Principle Routes of Exposure Inhalation, skin contact, and ingestion.

Acute toxicity

Skin

Eyes Corrosive to the eyes and may cause severe damage including blindness.

Corrosive. Can cause redness, pain, and severe skin burns. May discolor the skin. Harmful

if absorbed through skin.

Inhalation Poison - may be fatal if inhaled. Inhalation of corrosive mist may cause coughing, choking,

headache, dizziness, and weakness for several hours. Pulmonary edema may occur with tightness in the chest, shortness of breath, bluish skin, decreased blood pressure, and

increased heart rate.

Ingestion Corrosive. Causes burns. MAY BE FATAL IF SWALLOWED. Can cause immediate pain

and burning in the mouth, throat, esphogus and GI tract. May cause nausea, vomiting, and

diarrhea, and in severe cases death.

Chronic effects Chronic exposure to corrosive mists or vapors may cause erosion of the teeth. Chronic

exposure to mists containing sulfuric acid is a cancer hazard.

4. FIRST AID MEASURES

Do not get in eyes, on skin, or on clothing. Do not breathe dust/fume/gas/mist/vapors/spray. **General advice**

Eye contact Immediately flush eyes with gentle stream of water for at least 15 minutes, occasionally

lifting upper and lower eyelids. Call a physician immediately.

Skin contact Wash off immediately with soap and plenty of water for at least 15 minutes while removing

all contaminated clothing and shoes. Excess acid on skin can be neutralized with a 2%

solution of sodium bicarbonate in water. Call a physician immediately.

Inhalation Move to fresh air. If breathing is difficult, give oxygen, If not breathing, give artificial

respiration and contact emergency personnel. Call a physician immediately.

Do NOT induce vomiting. Drink plenty of water. Clean mouth with water. Call a physician Ingestion

immediately. Never give anything by mouth to an unconscious person.

Protection of First-aiders Use personal protective equipment. See Section 8 for more detail. Do not use

mouth-to-mouth method if victim ingested or inhaled the substance; induce artificial respiration with the aid of a pocket mask equipped with a one-way valve or other proper

respiratory medical device.

5. FIRE-FIGHTING MEASURES

Flammable properties Not flammable.

Flash point Not Applicable

Suitable extinguishing media Dry chemical or CO₂. DO NOT USE WATER.

Specific hazards arising from the chemical

Contact with most metals causes the formation of explosive and flammable hydrogen gas. React vigorously with water.

6. ACCIDENTAL RELEASE MEASURES

Ensure adequate ventilation. Avoid contact with skin, eyes, and inhalation of vapors. Use Personal precautions

personal protective equipment. Refer to Section 8.

Neutralize spill with alkaline material (sodium bicarbonate), being careful to prevent Methods for cleaning up

splattering, then containerize slurry and hold for later disposal. If local regulations permit, dilute slurry with water and rinse to drain with excess water. After cleaning, flush away

traces with water.
